Charge dynamique	300
Matériau	PE
Etat	Neuf
Produits	neuf
Type	Bac de rétention

DESCRIPTION DU PRODUIT

Drip tray 1280x820x160mm - 100 liter capacity

This drip tray comes complete with a plastic pallet and is suitable for efficiently collecting harmful substances such as alkalis and acids. Both the collector and the pallet are made of high-quality PE/Polyethylene. The drip tray is 5kg, has dimensions of 1280 x 820 x 160mm and has a collection capacity of 100 liters, up to a maximum weight of 300kg.

As can be seen from the product photos, the drip tray is additionally reinforced by means of a double layer in the corners of the outer wall, which is secured by nails. This makes the drip tray extra sturdy and more resistant to fall damage from above.

The enclosed pallet weighs 17kg, is 1200 x 800 x 150mm, has a maximum static load capacity of 5000kg and a dynamic load capacity of up to 800kg. This means that the product has a total weight of 22kg.

For example, use our trolley, item number 20862 to move this drip tray and our ramp 160mm high, item number 20861 to safely and easily drive drums directly onto the pallet into the drip tray.
